Last month price per certificate (September 30, 2017): EUR 1'254.43.

The Aspermont Equity Rotator Basket

The Actively Managed Certificate (AMC) linked to the Aspermont Equity Rotator Basket gives investors the opportunity to invest in a dynamic, broadly diversified European equity portfolio. Since investments are made exclusively in indices, stock-specific risks are eliminated. The strategy is designed to give the manager the opportunity to add direct sector exposure to country allocations, as well as the capacity to short sectors or countries with a particularly negative outlook. Target weightings are determined by both fundamental and technical aspects and are continuously reviewed and adjusted as necessary. We place emphasis on the relative strength indicator (RSI), which is a technical momentum indicator that compares the magnitude of recent gains to recent losses of the asset to identify overbought and oversold conditions. Event-driven opportunities may also be exploited as they occur through combinations of long and short strategies.

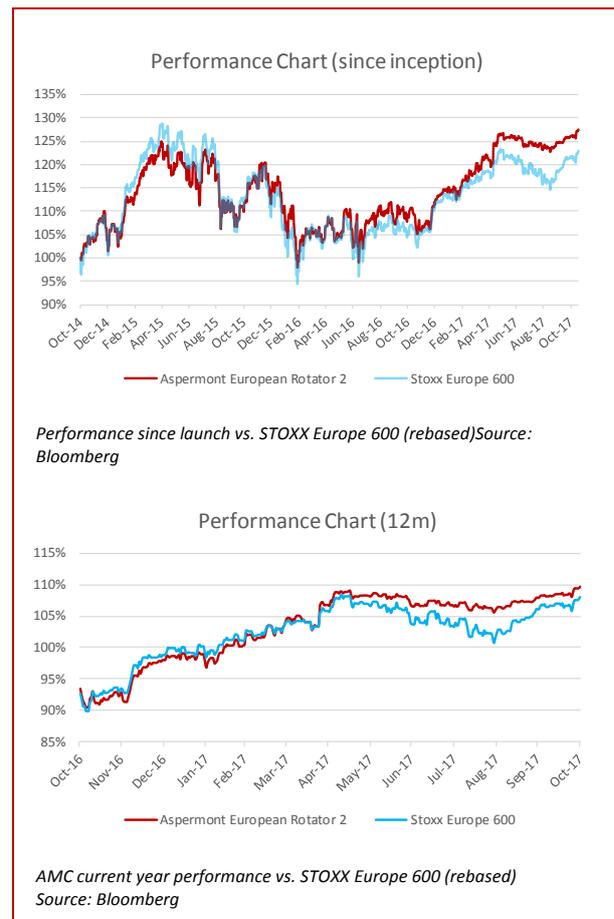

Manager's Comment

October proved to be a very accommodative month for equities across the board. Globally the MSCI World Index was up +1.81% (in USD). European Equities were up too, with the Stoxx 600 Index being up as much as +1.82% (in EUR). The Aspermont European Rotator Basket gained 1.62% in October, yet with only about 73% of equity exposure for most of the reporting period.

Currently the portfolio consists of 17 positions; 12 sectors (49% of AuM) and 4 country allocations (24% of AuM) and 27% cash. We started increasing out equity exposure throughout October, ending the month with 27% cash.

During October 75% of the positions posted profits. In terms of individual returns, Basic Resources (+8.63%) was by far the strongest performer as China's iron ore imports surge; Food & Beverage (+4.72%) rise aided by Pernod Ricard's 1Q beat sales as emerging markets rise 10%; Technology (+4.02%) led by ASML's strong 3Q sales that highlight positive industry signs. Due to its large weighing of 10.4% it was also the biggest contributor to the overall monthly performance of the Aspermont European Rotator Basket. The weakest performers were Banks (-1.77%) that were pulled lower through HSBC's downgrade.

When comparing the strategy performance with the Stoxx 600 Index, one needs to adjust for the significantly lower level of risk that we currently have in the strategy. Compared to MSCI World Index, the impact of the much stronger EUR should not be overlooked. We started increasing equity exposure over the course of the month.
